Traditionally we have found the sizes for top are reasonably standard but please bear in mind that some fabrics like elastin and spandex result in a “snug” fit because of the stretchy nature of the fabric. If a shirt has a high content of elastin or spandex then unless you like a “snug” fit we suggest that you consider going up a size.

Likewise with knitwear which is usually worn over a shirt it may be wise to go up a size again depending on the amount of elastin or spandex included in the knit.

Regardless, our returns policy provides for the return of any item should it be the wrong size.
